Drug Class	Drug Name	Gram positive cocci			Gram negative bacilli					Gram negative cocci		Anaerobes	Atypicals
		MRSA	MSSA	Streptococci	E. coli	P. mirabilis	Klebsiella	Pseudomonas	ESCAPPM	N. gonorrhoeae	N. meningitidis		
Lincosamide	Clindamycin												
Tetracyclines	Doxycycline												
Glycopeptides	Vancomycin												
Antimetabolite	Trimethoprim/Sulfameth												
Anti-staphylococcal pen	Naficillin												
	Oxacillin												
	Flucloxacillin												
Aminopenicillins with be	Amoxicillin-Clavulanic Acid												
	Ampicillin/Sulbactam												
	Piperacillin-Tazobactam												
1st-gen cephalosporin	Cefazolin												
	Cefalexin												
2nd-gen cephalosporin	Cephotetan												
	Cefoxitin												
3rd-gen cephalosporin	Ceftriaxone												
4th-gen cephalosporin	Cefepime												
	Ceftazidime												
Carbapenems	Ertapenem												
	Imipenem												
	Meropenem												
Quinolones	Ciprofloxacin												
	Levofloxacin												
	Moxifloxacin												
Macrolides	Azithromycin												
Penicillin	Benzylpenicillin												
Aminopenicillins	Ampicillin												
	Amoxicillin												
Monobactams	Aztreonam												
Aminoglycosides	Gentamicin												
	Tobramycin												
	Amikacin												
Nitroimidazoles	Metronidazole
